

ABOUT THE 1135 ULTIMATE RESTROOM PULL

Trimco's 1135 Series Ultimate Restroom Pulls are expertly manufactured from stainless steel, bronze or brass for durability and long life. The Healthy Hardware® 710CU Finish is made from bactericidal copper alloy touch surfaces. These U.S. Environmental Protection Agency (EPA) registered alloys, when cleaned regularly, have been proven to kill 99.9% of infectious bacteria* like e-Coli, MRSA, Staph & VRE. It is not a coating, it's an all-natural, solid copper-based alloy that will last for the life of the product. The 1135's have an optional 6" and 9" Center-to-Center and they are ADA Compliant.

FEATURES

- Hands-free pull
- Extremely durable 2-point attachment method
- Grip can be mounted down or upward
- Back-to-Back mounting available
- Available with bactericidal copper alloy or stainless steel
- Healthy Hardware - Proven to kill 99.9% of infectious bacteria*
- ADA compliant

APPLICATIONS

- Public Buildings & Facilities
- Commercial & Industrial Buildings
- Government & Military Facilities
- Hospitality
- Multifamily & Mixed Use

Mounted Down

*Laboratory testing shows that, when cleaned regularly, CuVerro surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant Staphylococcus aureus (MRSA), Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, E. coli O157:H7, and Vancomycin-Resistant Enterococcus faecalis (VRE). The use of CuVerro® bactericidal copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. CuVerro® is a registered trademark of Wieland North America, Inc. and is used with permission (TR-0002-1509). See www.CuVerro.com for more details.
