

MAGSTRIKEKIT

Magnetic Strike Template Set

The MAGSTRIKEKIT is a set of temporary magnetic strikes for installing the LKM7000 series of locks. The strikes can be moved to ensure good lock alignment without permanently attaching the strike to the frame.

The recommended distance from the floor to the center of the strike is 43" this keeps the lock within ADA requirement.

The strikes are painted red as an indicator so the installer will NOT accidentally leave this strike on the door.
