

Trilogy DL4100 Series Locks

ADDENDUM

"Privacy Terminated on Exit Only"

Function 68 has been enhanced to allow for an *indefinite* Privacy Time-Out Duration.

ORIGINAL FUNCTIONALITY:

Specify Privacy Time-Out Duration

The **Privacy Function** is enabled by programming Function 67, Option 35. In addition, Function 68 is normally used to specify the **Privacy Time-Out Duration** (in minutes) by entering a number between 001-250 (be sure to enter 3 digits).

Privacy Time-Out Duration is the maximum time the lock will remain in Privacy Mode, before returning to standard operation (factory default time is 10 minutes).

ENHANCED FUNCTIONALITY:

Privacy Terminated on Exit Only (No Timeout)

Enter 251 to *disable the Privacy Time-Out Duration*: Privacy will last indefinitely until either the inside lever is turned or until a Master or valid Manager User Code is entered at the keypad. In addition, the flashing LED is disabled.
